

When fat, oil and grease clog your municipal and residential wastewater system. Arm your crews with Grease-X®

### **The total package solution.**

Available now – Grease-X® - with the power to keep your municipal and residential wastewater systems clear of fats, oils and grease (FOG) using your own crews and equipment. The three Grease-X formulas make a complete package to clear FOG-choked pipelines and lift stations, prevent FOG buildup and eliminate pipeline odors.

### **Grease-X Biozyme**

Grease-X Biozyme uses nature's own microorganisms to digest FOG in your wastewater system and prevent future backups. Grease-X Biozyme features highly concentrated microbes that coat pipelines and lift stations, reproducing and spreading throughout your system. Biozyme microbes also secrete enzymes that further digest FOG. Grease-X Biozyme is all natural, non-caustic and non-polluting. And because Biozyme microbes actually eat grease rather than just break it into smaller pieces, it reduces the load on wastewater treatment plants.

### **Grease-X Emulsifier**

Grease-X Emulsifier is a concentrated, heavy-duty emulsifier that penetrates and softens all forms of FOG to clear blockages and restore flow. Grease-X Emulsifier contains biodegradable, non-ionic surfactants, chelating agents and water. Grease-X Emulsifier is non-caustic and non-polluting; it contains no halogenated solvents and no corrosive chemicals. Plus, its excellent biodegradability makes Grease-X Emulsifier ideal for meeting Resource Conservation and Recovery Act (RCRA) regulations for mixed wastes.

### **Grease-X Jet**

Grease-X Jet is a fast-acting version of Grease-X Emulsifier that is specially formulated for use with jetting equipment. When used with your jetting equipment, it quickly unblocks FOG-choked pipelines and immediately restores pipe flow capacity. And unlike many solvent-based cleaners, Grease-X Jet breaks down grease, oil and petroleum products without generating toxic flammable vapors.

### **From the makers of RootX®**

You can count on Grease-X to be easy to use and effective because it comes from the makers of Root. Grease-X continues the RootX tradition of non-caustic, non-polluting pipeline maintenance products that are easy for municipal and residential crews to apply.
