

RootX Center Sealed 20 lb. Bag Center Seam Release & Mixing Instructions

1. Remove the square top pad of cardboard from the RootX box and lay it on the ground. You will use this cardboard later to protect the bag from puncturing when dropping the bag on the ground.
2. Grasp both ends of the new 20 lb. bag and work the RootX chemical on both sides towards the middle seam in the bag.
3. Orientate the 20 lb. bag so that the middle dividing seam is vertical (pointed up and down).
4. Firmly grasp the bag and drop it from head-height onto the protective cardboard. You want the bag to land on its edge seam to force the middle seam open.
5. If the seal has not separated repeat steps 3 and 4 above.
6. Once the seam starts to open, grasp both sides of the bag near the seam and pull apart to completely open the middle seam.
7. You can now pour the RootX chemical back and forth within the bag to mix. Do this for 1 minute to completely mix the two components.

How to Video Link

For further instructions or assistance please call us at (800)844-4974 or visit our website at <https://rootx.com/municipalities/rootxperts/videos> to watch a video on how to release the center seam.
